

Primary school students savour their microscopic glimpse of the wonders of science with JCGSS student scientists

Primary school students marvel at a sophisticated machine engineered by JCGSS Design and Technology students

55th Anniversary Open Day at Jockey Club Government Secondary School

Jockey Club Government Secondary School held their 55th Anniversary Open Day on 24 October 2014. It started at 9:30 in the morning and ran throughout the day. It was a great chance for the school to showcase some of the commendable teaching and learning that are going on. The School Orchestra and Uniform Teams welcomed guests and visitors on arrival. They were then led through to the school hall, where each subject area had set up displays to showcase topics of interest, commendable student work or fun subject-based activities. There were remote-controlled machines, science experiments such as the Chemistry for Fun and Water Rockets and word games in different languages prepared by our JCGSS students.

Throughout the day at set intervals there were student performances, which were held in the school basketball court. The guests and visitors were invited to view the performances from the school choir, who sang with great harmony, and the Boys' Brigade parade marching routine - a true example of discipline and teamwork in action.

On the day, hundreds of guests and visitors including alumni, parents, friends and students joined and enjoyed the games organized by different departments. They were given some homemade souvenirs like pencil cases inscribed with a Chinese poem from the History Department and bookmarks from the English Department and the Chinese Department. The Open Day was indeed a great success.
