

S2 Designing a new school uniform

Tiffany Lau (2C)

For many students, the design of the school uniform is very important as they wear it five days a week. As our school plans to change the design of our winter uniform, I would like to give a few suggestions, and here are my ideas.

I would like to redesign the school uniform for girls to make it more fashionable and comfortable. First, the new top is a long-sleeved white cotton shirt. Instead of the traditional brown school blazer, students can choose to wear a black denim or leather jacket, which is more stylish, to keep themselves warm. The uniform also comes with a brown hat and a navy blue scarf. Students can wear them to school if it is very cold.

As for the bottom, students will wear a brown checked cotton skirt. Instead of socks, which only cover part of the legs, students can wear a pair of black wool leggings to keep their legs warm and comfortable in the cold weather. For the footwear, students can wear leather boots which are black or brown in colour.

Although my design is fashionable, it is simple because its main colours are black, white and brown only, so it is suitable for students. I hope the school and schoolmates will like my new design.
